

I have found God during the pandemic by being safe and keeping the people around me safe and keeping my mask on. God has kept me safe and protected me from the virus and guided me into the light and helped me become a better person than I was before. I am happy that God has provided me with the strength to make my way through this pandemic and time of hardship. I am happy and blessed that my mother is a nurse, which means she is saving more lives each day with how hard she works.

Some positives that have come out of the pandemic are that people have become closer with their families and people that I know and love stayed safe from the virus. I got a chance to really pay attention to myself and to my personal needs, instead of always worrying about others and what they like. I believe that the pandemic has changed millions of people including myself on what they believe, how they feel and how they act.

Some negatives that have come out of this pandemic was that for some people God wasn't able to help them. A lot of people died during this pandemic due to Covid, stress, and depression. Many parents lost young children and babies to this pandemic. I pray that God is with them always during these hard and stressful times. 2020 was HARD and STRESSFUL, But we got through it, we made it out and I can't wait to see what 2021 has to offer us.

Over quarantine I did a lot. I had a lot of hardships but I overcame them. I prayed and helped others. In the beginning of COVID I was hard on myself since virtual school had started. I brought myself down a lot. I thought I was going to fail. At night I cried a lot, until I remembered what I told my aunt when my brother was in the hospital. I told her that God doesn't put you in situations that you can't handle so just keep having faith and things will get better. I kept trying and praying and at the end I passed with A's and B's. I knew God could do it, I just had to stay in faith .

During this hard time, I helped family members out. I went to my aunt's house, helped her get what she needed and just checked in on her. In addition, I helped my mom around the house. Knowing my brother's high risk of catching COVID, I tried my very best to help my mom with him. Some days I would come around the house listening to spiritual songs just to lighten a bad day. I know that I could have done more spiritual things, but at least I did something .

I comforted friends who were sad. When people talked about me being different, I didn't talk about them back. Even though people want to see you down, I stayed prayerful and knew God would handle it for me. I started reading daily scripture verses to keep going. I feel like I have grown and changed tremendously over quarantine spiritually and mentally. I like this change and I feel I'm going to grow more in faith .

This concludes how I have grown over quarantine. I prayed, helped others, and spread Jesus' word. I overcame hardships that I thought I wasn't going to be able to do. This is how I know God will do it for you just stay in faith .

A way that I have found God in this pandemic is being positive about things and telling God that not all things are bad. There are some good things in this pandemic . I have been at home with my family having family time . God has put us all together to be with our family and have a good time at home. He is trying to show us that you can have a good time at home with no phone just in your room reading a book .

The positive things that have come out of this pandemic is that I have been home not thinking about things . I have been with my sister and brother having a good time . Cooking for my mom making her happy . Seeing all my family together as one. Just being able to sit down and not do nothing is sometimes what you need .

The negative things that have come out of this pandemic is that I can not do everything that I want. I really wanted to go see my friends but could not because of the pandemic. I couldn't do a lot of things because of everything that's going on. I'm happy that we can do some things now. I hope everything will be ok by the end of school so that I can finally have fun!

How have you found God in this pandemic?

My family and I knew God before the pandemic. Praying is something we already do on a regular basis. I can say that the pandemic has made us pray even more. We have prayed for strangers and their families. I know that it's God who is keeping us safe.

What are some positive things that have come out of this pandemic?

My family and I have been healthy through this whole pandemic, I pray that we stay healthy. My family got to spend more time together and watch movies, the news, play games, and just talk. My family was able to come together and make care packages for some people in need. It's a good feeling to be able to help someone else. I pay more attention to germs, wash my hands more, and I don't go anywhere without my mask now.

What are some negative things that have come out of this pandemic?

Thousands of people died. People died without people there who loved them at their side. Thousands were sick with almost no hope. Schools and businesses had to close down. People lost their jobs, homes, and were hungry. Some grocery stores put limits on supplies. People were arguing and fighting if someone coughed around another person. One of the worst things was our President didn't help us. That's why we pray to God.

Finding God during this pandemic was very hard. It was hard because I'm not the type of person to pray. But one way I did find God was when I was stuck in the house and asked him what to do today this summer, and that was the most important way that I found god.

What some positive things that have come out of this pandemic was me being able to work on myself and develop new talents. I learned new things about myself. I was amazing at swimming. I started drawing more, and learned how to cook.

Negative things that have come out of this pandemic are losing thousands of people everyday. Not being able to live my childhood. A lot of pressure on school. I lost track of my daily routine, which caused me to lose all my plans I had for the school year.

I have found God in these tough and weird times by watching prayer services and praying privately. He has shown me and guided me to myself and other aspects and in my life. He has also brought light into my life. He has given me things and has taken some away.

Some positive things that have happened this year were the recent Black Lives Matter protests about police brutality. The protests had brought the injustice up and made it seen by everyone everywhere. I also have met some pretty good friends this year and made bonds with people. We also had time away from school and other things so that was peaceful.

Some negative things that has happened this year is the George Floyd murder. Fear was incited, many were killed and abused during protests . Excessive covid outbreaks, people are/were sick, hundreds of thousands of people have died or know someone who has died this year. This year was a sad year for many people.

I have found God in this pandemic by praying to him every day. I prayed to him to keep myself and everybody safe and sound. I also found God in this pandemic by being helped in a bad situation that we're in right now. He has helped us through the tough times and danger we are in. God is our light and savior. We follow His lead in the tough and challenging times. I have found God in the most challenging time, deep down in my heart to be with me at all times. God is helping us to have everything back to normal. God has helped me in numerous ways and that is how I found him in this pandemic.

Some positive things that have come out of this pandemic is that our health comes before anything. Workers are getting the praise they deserve. People are starting to grow closer and closer to their family. People are getting stimulus checks and needs for their family and themselves are being met. Another positive thing that came out of this pandemic is that people are somewhat safe and sound. Those are the positive things I've found in this pandemic.

Negative things that have come out of this pandemic is that a lot of people are getting sick and dying. We've lost a lot of famous people due to awful reasons. People are getting laid off so they don't make a lot of money. A lot more violence is going on in cities. People don't wear their masks and cases are rising along with deaths putting us in even more danger. Those are the negative things I've found in this pandemic.
